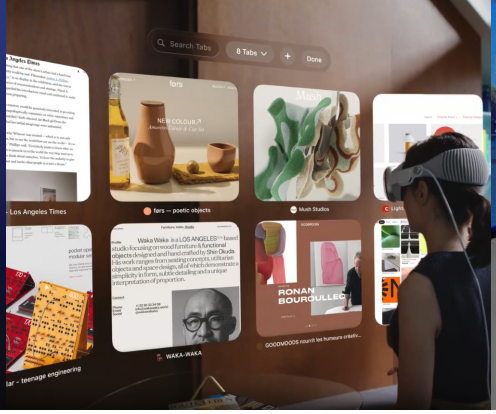
CAGE Code: 1ZUS8



Delivering Proven Technology Solutions for Government Operations

Equitas supports federal agencies and state governments engaged in economic development, infrastructure modernization, or workforce transformation. We deliver secure, compliant, and outcome-driven solutions that improve systems, services, and operational performance. Let's transform bold ideas into reality.

Core Offerings

Innovation at Scale
Equitas provides purpose-built technology solutions that enable agencies to modernize operations, enhance data-driven decision-making, and deliver efficient, outcome-focused public services at scale.

Digital Twins
Our immersive real-time 3D platform accelerates site selection, infrastructure development and smart city planning, turning data into decisive action for economic growth.

Immersive Learning
We help agencies design and implement next-generation learning environments that advance federal workforce development programs by upskilling workers, strengthening education pipelines, and supporting workforce readiness at scale.

Operational Platforms
From AI-powered analytics to supply chain intelligence, our mission-aligned digital platforms optimize operations, empower frontline teams and unlock new efficiencies across sectors.

Differentiators:

- **White glove:** Custom solutions developed in collaboration with end-users to align with federal IT modernization roadmaps
- **Industry-wide expertise:** Our team are government decision-makers, tech execs, creatives, engineers and educational leaders.
- **Technology leaders:** Our partnerships with leading real-time 3D engineers and creators across the world ensure project success.
- **Any platform, any user:** VR, AR, desktop, tablet or mobile. Use your product wherever and however you need to.
- **AI integration:** Integrating AI from project inception to delivery.

Performances past and current

VisionSC: Virtual Site Selection for Modern Economic Development

VisionSC is an economic development visualization platform created in partnership with the South Carolina Department of Commerce to help communities showcase their assets to prospective investors and site selectors without requiring a physical visit. Using high-quality imagery, drone video, and immersive 3D content, the platform brings local properties, infrastructure, workforce resources, and quality-of-life features to life. VisionSC enables economic development partners to highlight sites, utilities, transportation networks, talent assets, and regional connectivity, accelerating decision-making and helping communities of all sizes compete more effectively for investment.

South Carolina State Metaversity:
Transforming Agriculture Education

South Carolina State University and Equitas are developing a Digital Twin platform and advanced agriculture curriculum spanning soil, plant, and animal sciences to modernize agricultural education and workforce development. Delivered through the SC State Metaversity, the platform uses immersive virtual reality and real-time 3D technology to expand access to experiential learning statewide. This digital-first approach equips students and professionals with future-ready skills to support innovation and sustainability in agriculture.

South Carolina Research Authority Innovation Hub:
Driving Technology Commercialization

A statewide initiative designed to accelerate technology commercialization and equitable economic growth across six regions by addressing ecosystem gaps and de-risking startups in priority deep-tech sectors. Equitas developed NavigateSC as a centralized digital operating system that integrates AI-driven evaluation, partner matching, ecosystem mapping, and commercialization pathway modeling. By unifying regional efforts through data-informed decision support, NavigateSC strengthens startup pipelines, improves federal funding readiness, and enables the scalable delivery of pilots, SBIR/STTR submissions, and job-creating outcomes.
